Total Hours		21

Courses to total 21 credits for this minor

- Upon completing the minor in Naval Science, students will have gained a general introduction to the United States Navy and Marine Corps that emphasizes organizational structure, warfare components and assigned roles and missions.
- Students will be able to discuss the influence of sea power on history that incorporates both a historical and political science process to explore the major events, attitudes, personalities, and circumstances.
- The minor will introduce many of the fundamental concepts of leadership, management, ethics, nautical and land-based navigation, military theory, naval engineering and combat systems. Students will be able to apply critical thinking skills, professional writing and technical proficiency.
