BIOP 404 (s) Special Topics
Credit arranged.

BIOP 423 Planning Sustainable Places
3 credits
Joint-listed with BIOP 523
This course discusses the concept of sustainable development and its promises and pitfalls as a leading concept for the planning and design of communities. The course provides an overview of the different interpretations of sustainability and discusses the usefulness of these interpretations for planning in the context of the communities in which we live. Additional work required for graduate credit.

Credit arranged.

BIOP 520 Introduction to Bioregional Planning
3 credits
This class introduces students to bioregional planning concepts and shows the difference between “traditional” planning and bioregional planning, and explores the relevance of “traditional” planning and bioregional planning for communities in the American West.

BIOP 521 Local and Regional Comprehensive Planning
3 credits
Provides an overview of the processes and methods for preparing comprehensive plans for local and county governments in the context of federal and state lands and regional growth management: Integrates land-use with economic development, housing, historic preservation, agricultural viability. Includes lectures by practitioners and interdisciplinary faculty, and a service-learning project. (Fall only)

BIOP 522 Bioregional Planning Methods
3 credits
This is an overview course of the methods used in making evidence based decisions in regional planning. This course covers the most common ways that planners collect and analyze data. The course specifically focuses on the challenges of the collection, analysis and evaluation of data within the setting of non-metropolitan areas and rural communities.

BIOP 523 Planning Sustainable Places
3 credits
Joint-listed with BIOP 423
This course discusses the concept of sustainable development and its promises and pitfalls as a leading concept for the planning and design of communities. The course provides an overview of the different interpretations of sustainability and discusses the usefulness of these interpretations for planning in the context of the communities in which we live. Additional work required for graduate credit.
