PLANT SCIENCE (PLSC)

PLSC 100 Survey/Plant & Soil Sciences
1-3 credits, max 3
This course is designed to introduce students to a scientific examination of the soil and plant relationships that affect the production and propagation of field crops and landscape plants. Topics include soils, irrigation, crop and weed identification, diseases, insects and plant growth regulators. (Spring only)

PLSC 102 The Science of Plants in Agriculture
3 credits
Principles of structure, biology, and management of agronomic and horticultural crops; interaction of crop plants and cropping systems with environment; current issues related to plant science. Two lecture and one 2-hr lab a week.

PLSC 200 Principles of Horticulture
3 credits
An introduction to the production and management of edible and ornamental horticultural crops and the maintenance of plants and turf in urban landscapes. Two lecture and two hours of lab a week; two field trips. (Spring, alt/yr)
Prereq: PLSC 102.

PLSC 204 (s) Special Topics
Credit arranged.

PLSC 205 General Botany
4 credits
Growth, development and ecology of plants, fungi, and protists in relation to their environments. Recommended Preparation: CHEM 101 and PLSC 102. (Spring only)
Prereq: BIOL 114 or BIOL 115.

PLSC 207 Introduction to Biotechnology
3 credits
Cross-listed with GENE 207
Offers an overview of modern biotechnology, focusing on basic concepts and applications of biotechnology with regards to plants, animals, environment and microorganisms, and medicine. Recommended preparation: CHEM 101 or CHEM 111. (Fall, alt/yr)

PLSC 212 Master Gardener
1-3 credits, max 3
Basic horticultural skills required for home gardeners and landscapers, including soil, water, and fertility management, composting, pest and disease identification and management, vegetable and fruit culture, ornamentals, plant propagation, and lawn care. Graded P/F. Field trips.

PLSC 300 Plant Propagation
3 credits
Sexual and asexual propagation techniques of herbaceous and woody ornamental plants; propagation methods covered including seed, cuttings, layering, grafting, and cloning/tissue culture. Two lectures and one 3-hour lab a week. (Alt/yr)
Prereq: PLSC 102, PLSC 201, or BIOL 115.

PLSC 338 Weed Control
4 credits
Nature and scope of weed problems, identification and biology of weeds, principles, theory, and practice of mechanical, chemical, and biological control of weeds; legal considerations; integration of methods into functional management systems. Two lectures and one 3-hour lab a week. Recommended Preparation: PLSC 102 or equivalent.

PLSC 340 Nursery Management
3 credits
Management of commercial nurseries from plant propagation through sale of the plants. Cooperative: open to WSU degree-seeking students. (Alt/yr)

PLSC 341 Nursery Management Laboratory
1 credit
Lab study relevant to PLSC 340. Experiments on and demonstrations of different practices used in nurseries. One 2-hr lab a wk; one 1-day field trip. Cooperative: open to WSU degree-seeking students.
Coreq: PLSC 340.

PLSC 398 (s) Internship
1-6 credits, max 6
Graded P/F.
Prereq: Permission of department.

PLSC 400 (s) Seminar
1 credit.

PLSC 401 Plant Physiology
3 credits
Application of physiological principles to the management of plants in agronomic, horticultural and forest systems. (Spring, alt even/yr)
Prereq: PLSC 205 or BIOL 115 and BIOL 115L or Permission.

PLSC 402 Undergraduate Research in Plant Science
1-6 credits, max 6
This course offers credits to students interested in gaining first-hand experience in today's plant research. Each student will acquire research skills by conducting laboratory or field research on a well-defined topic agreed to by the student and by a faculty supervisor. Students must receive permission from that supervisor prior to enrolling. This course is open to all undergraduates, and may be taken multiple times.
Prereq: PLSC 205.

PLSC 510 Invasive Plant Biology
3 credits
Joint-listed with PLSC 510
Biology, ecology, and physiology of weeds with emphasis on crop and weed interactions. Requirements for grad cr include comprehensive term paper and class presentation on weed-crop interaction. Two lec and one 3-hr lab a wk. Cooperative: open to WSU degree-seeking students. (Alt/yr)
PLSC 419 Plant Community Restoration Methods
2 credits
Students will participate in classroom discussions surrounding topics that are important to modification and implementation of a restoration plan. Students will also participate in practical, hands-on activities during laboratory periods. Those activities include operation of equipment for cultivation and seeding, calibration of herbicide sprayers, calibration of drills, transplanting techniques, monitoring and evaluation of restoration projects and visits to restoration projects.
Prereq: REM 221, equivalent or permission.

PLSC 433 Plant Tissue Culture Techniques
3 credits
Joint-listed with PLSC 533
Laboratory-oriented course involving tissue culture techniques with an emphasis on regenerating herbaceous and woody plant species from organs or tissues. Requirements for grad cr include completion of a special project and report. One lec and 5 hrs of lab a wk. Recommended Preparation: PLSC 300. (Alt/yrs)

PLSC 438 Pesticides in the Environment
3 credits
Gen Ed: Senior Experience
Cross-listed with ENT 438 and SOIL 438
Principles of pesticide fate in soil, water, and air; pesticide metabolism in plants, pesticide toxicity, and pesticide mode-mechanism of action; pest resistance to pesticides; biotechnology in pest control; regulations and liability; equipment application technology; pesticide transport, storage, and disposal; and social and ethical considerations. Recommended Preparation: CHEM 275.

PLSC 440 Advanced Laboratory Techniques
4 credits
Cross-listed with GENE 440
Intensive hypothesis-driven laboratory course that will prepare the student for research in molecular biology; emphasis on areas of microbial physiology, microbial genetics, immunology, and pathogenic microbiology. (Spring only)
Prereq: BIOL 250.

PLSC 446 Plant Breeding
3 credits
Joint-listed with PLSC 546
Application of genetic principles to improvement of crop plants. Grad students reqd to complete additional term paper. (Alt/yrs)
Prereq: GENE 314 or Equivalent.

PLSC 451 Vegetable Crops
3 credits
Joint-listed with PLSC 551
Production, physiology, storage, and marketing of major and minor vegetable, herb, and spice crops from a worldwide perspective. Recommended preparation: PIsC 201, PIsC 205, PIsC 300 or equivalents. Cooperative: available to WSU degree-seeking students.
Prereq: PLSC 102 or equivalent.

PLSC 464 Landscape Maintenance
3 credits
Use and culture of landscape plants to enhance the environment. Two lec and one 2-hr lab a wk; one 1-day field trip. Recommended Preparation: SOIL 205 and LARC 288. (Alt/yrs)
Prereq: PLSC 102 or BIOL 213 or Permission.

PLSC 476 Cell Biology
3 credits
Joint-listed with PLSC 576
Introduction to the organization and function of the major components of the eukaryotic cell; emphasis on the composition of cells, the structures and assembly processes of molecules that make up cells, diversity of cell types found in multicellular organisms, and how common interacting processes are coordinately controlled. Extra oral and/or written assignments reqd for graduate credit. (Spring, Alt/yrs)
Prereq: BIOL 115 and either BIOL 300 or BIOL 380.

PLSC 480 Field Trip
1 credit, max 3
Three-day field trip to production areas.
Prereq: Permission.

PLSC 486 Plant Biochemistry
3 credits
Joint-listed with PLSC 586
An in-depth introduction to metabolic processes carried out by plants, some fungi, and some alga with emphasis on cell wall synthesis, hormone synthesis, and photosynthesis. Extra oral and/or written assignments reqd for grad cr. (Spring, alt/years)
Prereq: BIOL 300 or BIOL 380.

PLSC 488 Genetic Engineering
3 credits
Joint-listed with PLSC 588, Cross-listed with GENE 488
Techniques and theory underlying practical genetic modifications of plants, microbes, and animals. Extra oral and/or written assignments required for graduate credit. Recommended Preparation: BIOL 380. (Fall only)
Prereq: GENE 314 or BIOL 310.

PLSC 490 Potato Science
3 credits
Joint-listed with PLSC 590
History, botanical characteristics, seed physiology and production, plant population, physiology of growth, and pest management; factors influencing maturation, harvest, yield, grade, bruise control, storage, and quality maintenance; economics of production and research on a global basis. Requirements for graduate credit include comprehensive term paper and class presentation on selected topic. Cooperative: open to WSU degree-seeking students.

PLSC 498 (s) Internship
Credit arranged.

PLSC 499 (s) Directed Study
Credit arranged.

PLSC 500 Master's Research and Thesis
Credit arranged.

PLSC 501 (s) Seminar
Credit arranged.

PLSC 502 (s) Directed Study
Credit arranged.

PLSC 503 (s) Workshop
Credit arranged.

PLSC 504 (s) Special Topics
Credit arranged.

PLSC 505 (s) Professional Development
Credit arranged.
PLSC 510 Invasive Plant Biology
3 credits
Joint-listed with PLSC 410
Biology, ecology, and physiology of weeds with emphasis on crop and weed interactions. Requirements for grad cr include comprehensive term paper and class presentation on weed-crop interaction. Two lec and one 3-hr lab a wk. PLSC 410 is a cooperative course open to WSU degree-seeking students. (Alt/yr)

PLSC 523 Potato Industry Field Trip
1 credit
Six-day field trip to see the southern Idaho potato industry. Experience production, storage, biotechnology, seed, fresh pack and processing, equipment, food science, and agribusiness. One additional class meeting. The course is offered every other year.

PLSC 533 Plant Tissue Culture Techniques
3 credits
Joint-listed with PLSC 433
Laboratory-oriented course involving tissue culture techniques with an emphasis on regenerating herbaceous and woody plant species from organs or tissues. Requirements for grad cr include completion of a special project and report. One lec and 5 hrs of lab a wk. Recommended Preparation: PLSC 300. Cooperative: open to WSU degree-seeking students. (Alt/yr)

PLSC 542 Biochemistry
3 credits
Maximum of 7 credits in any combination of BIOL 380, PLSC 542, and BIOL 554. Intermediate biochemistry; intro to metabolism and the chemical and physical properties of biomolecules. (Fall only)
Prereq: CHEM 372; BIOL 380 or Coreq: CHEM 302 or 306; or Permission.

PLSC 546 Plant Breeding
3 credits
Joint-listed with PLSC 446
Application of genetic principles to improvement of crop plants. Grad students reqd to complete additional term paper. Cooperative: open to WSU degree-seeking students. (Alt/yr)
Prereq: GENE 314 or Equivalent.

PLSC 547 Biometrics for Plant Scientists
3 credits
Use of biometrical techniques in research with particular emphasis on designing, analyzing, and interpreting agricultural and biological experiments; application of statistical methods to biological experiments and problems that may be encountered when applying these techniques to biological systems. Cooperative: open to WSU degree-seeking students. (Alt/yr)
Prereq: PLSC 102 and STAT 431 or Equivalent.

PLSC 551 Vegetable Crops
3 credits
Joint-listed with PLSC 451
Production, physiology, storage, and marketing of major and minor vegetable, herb, and spice crops from a worldwide perspective. Recommended preparation: PLSc 201, PLSc 205, PLSc 300 or equivalents. Cooperative: open to WSU degree-seeking students.
Prereq: PLSC 102 or equivalent.

PLSC 576 Cell Biology
3 credits
Joint-listed with PLSC 476
Introduction to the organization and function of the major components of the eukaryotic cell; emphasis on the composition of cells, the structures and assembly processes of molecules that make up cells, diversity of cell types found in multicellular organisms, and how common interacting processes are coordinately controlled. Extra oral and/or written assignments reqd for graduate credit. (Spring, Alt/yr)
Prereq: BIOL 115 and either BIOL 300 or BIOL 380.

PLSC 586 Plant Biochemistry
3 credits
Joint-listed with PLSC 486
An in-depth introduction to metabolic processes carried out by plants, some fungi, and some algae with emphasis on cell wall synthesis, hormone synthesis, and photosynthesis. Extra oral and/or written assignments reqd for graduate credit. Recommended Preparation: BIOL 380. (Fall only)
Prereq: BIOL 300 or BIOL 380.

PLSC 588 Genetic Engineering
3 credits
Joint-listed with PLSC 488, Cross-listed with GENE 588
Techniques and theory underlying practical genetic modifications of plants, microbes, and animals. Extra oral and/or written assignments required for graduate credit. Recommended Preparation: BIOL 380. (Fall only)
Prereq: GENE 314 or BIOL 310.

PLSC 590 Potato Science
3 credits
Joint-listed with PLSC 490
History, botanical characteristics, seed physiology and production, plant population, physiology of growth, and pest management; factors influencing maturation, harvest, yield, grade, bruise control, storage, and quality maintenance; economics of production and research on a global basis. Requirements for graduate credit include comprehensive term paper and class presentation on selected topic. Cooperative: open to WSU degree-seeking students.

PLSC 597 (s) Practicum
Credit arranged.

PLSC 598 (s) Internship
Credit arranged.

PLSC 599 (s) Research
Credit arranged
Research not directly related to a thesis or dissertation.
Prereq: Permission.

PLSC 600 Doctoral Research and Dissertation
Credit arranged.
