SOILS (SOIL)

SOIL 205 The Soil Ecosystem
3 credits
*Gen Ed: Natural and Applied Sciences*
Introduction to the physical, chemical, and biological nature of soils.
Prereq: CHEM 101 or CHEM 111 or Instructor Permission

SOIL 206 The Soil Ecosystem Lab
1 credit
*Gen Ed: Natural and Applied Sciences*
Lab study relevant to SOIL 205. Experiments and demonstrations on basic and applied aspects of soil science. One 3-hour lab per week.
Coreq: SOIL 205

SOIL 210 Food Systems and Healthy Lifestyles
3 credits
Introduction to food systems including the historical development of our current global food system. Linkages among the production, marketing and transportation of food and food policy on human health will be explored. Students will complete a semester-long assessment of the local food system and its impacts on individual, school and community health and strategies to improve the food system

SOIL 299 (s) Directed Study
Credit arranged

SOIL 398 (s) Internship
1-6 credits, max 6
Graded P/F.
Prereq: Department Permission

SOIL 400 (s) Seminar
Credit arranged

SOIL 404 (s) Seminar
Credit arranged

SOIL 415 Soil and Environmental Physics
3 credits
Joint-listed with SOIL 515
Physical properties of soils and their relationships to moisture, aeration, and temperature; plant-soil-atmospheric relationships; solute transport and soil salinity. Two lectures and one 3-hour lab per week.
Recommended Preparation: SOIL 205, SOIL 206, and PHYS 111. SOIL 415 is a cooperative course available to WSU degree-seeking students. (Fall, alt/years)

SOIL 417 Market Garden Practicum
1-6 credits
Experiential learning based course that covers all aspects of running a small acreage vegetable farm. Topics include farm planning, crop rotation, soil fertility and testing, weed management, and food systems. Students satisfy credit hours through participation in lecture/discussion, field work, and field trips. Class meets at the Plant Science Farm.
Recommended preparation: SOIL 205.

SOIL 422 Environmental Soil Chemistry
3 credits
Chemical processes in soil environment. Recommended Preparation:
SOIL 205, SOIL 206, and CHEM 112. Cooperative: open to WSU degree-seeking students. (Alt/years)
SOIL 452 Environmental Water Quality
3 credits
Joint-listed with SOIL 552
Engineering design to monitor, evaluate, and minimize non-point pollution from agriculture, environmentally acceptable disposal of wastes, bioremediation. Additional project and report required for graduate credit. Two lectures and one 3-hour lab per week.
Prereq: BE 355 and CHEM 112, CHEM 112L; and SOIL 205 or BIOL 250

SOIL 454 Pedology
3 credits
Morphology, genesis, and classification of soils; distribution of soils as related to environmental processes and factors. Two lectures and one 4-hour lab per week. Recommended Preparation: SOIL 205 and SOIL 206. Cooperative: open to WSU degree-seeking students.

SOIL 456 North Idaho Field Trip
1 credit
Joint-listed with SOIL 556
Soils and land use in northern Idaho ecosystems; emphasis on soil parent materials, soil formation and morphology, and soil-plant community relationships. Graded P/F. One 3-day field trip; additional class meetings and assignments before and after field trip. Cooperative: open to WSU degree-seeking students.
Prereq: SOIL 205 or Permission

SOIL 458 Soil and Site Evaluation
2 credits
Description and evaluation of soils; emphasis on morphological features and properties that influence land use. Graded P/F. Two to four hours of lab per week (may include local field trips); one 3-day or one 6-day field trip. Recommended preparation: SOIL 205. Cooperative: open to WSU degree-seeking students.

SOIL 499 (s) Directed Study
Credit arranged

SOIL 500 Master's Research and Thesis
Credit arranged

SOIL 501 (s) Seminar
Credit arranged

SOIL 502 (s) Directed Study
Credit arranged

SOIL 504 (s) Special Topics
Credit arranged

SOIL 514 Environmental Geophysics
3 credits
This course will provide an introduction to near-surface geophysical techniques. The aim is to provide a solid foundation on physical principles used to non-invasively study characteristics and properties of the earth in general, and the shallow subsurface in particular. We will discuss applications ranging from eco-hydrology, precision agriculture, and civil engineering to archeology. The course consists of two parts. Lectures will provide a conceptual understanding of the theory and methods, and a field-based case study will apply these concepts collecting integrated geophysical data that will be processed and interpreted to introduce students to practical procedures and challenges in environmental geophysics. Cooperative: open to WSU degree-seeking students.

SOIL 515 Soil and Environmental Physics
3 credits
Joint-listed with SOIL 415
Physical properties of soils and their relationships to moisture, aeration, and temperature; plant-soil-atmospheric relationships; solute transport and soil salinity. Two lectures and one 3-hour lab per week. Recommended Preparation: SOIL 205, SOIL 206, and PHYS 111. (Fall, alt/years)

SOIL 525 Microbial Ecology
3 credits
Joint-listed with SOIL 425
Biogeochemical activities and relationships of microorganisms in soil, water, plants, and animals. Extra oral and/or written assignments required for graduate credit. Recommended Preparation: MATH 143. (Spring alt/years).
Prereq: EPPN 154 or BIOL 250

SOIL 527 Sustainable Food Systems
3 credits
Joint-listed with SOIL 427
The purpose of this course is to help students apply systems thinking and systems methodological problem solving skills to identify and describe current and future food system issues. Through lectures, case studies and research students will explore elements and behavior of food systems that impart sustainability. Additional readings, research, and presentations required for graduate credit.
Prereq: FOR 221, REM 221, or SOIL 210; or Instructor Permission

SOIL 537 Soil Biochemistry
3 credits
Origin, chemical structure, and significance of soil biochemical compounds. Cooperative: open to WSU degree-seeking students. (Alt/years)
Prereq: SOIL 422, BIOL 380, BIOL 250 or Permission

SOIL 544 Water Quality in the Pacific Northwest
3 credits
Joint-listed with SOIL 444, Cross-listed with ENVS 544
Qualitative aspects of water are covered in this class. Major topics are qualitative aspects of (1) surface water, (2) groundwater, (3) drinking water, (4) water in the oceans, and (5) the human waste stream. Concepts presented are relevant to world-wide water quality issues and concepts; however, however, an emphasis is placed on issues within the four Pacific Northwest states (ID, AK, OR, WA).

SOIL 548 Drinking Water and Human Health
3 credits
Joint-listed with SOIL 448, Cross-listed with ENVS 548
Understand the characterization, testing, and treatment of chemical, microbial, and hazardous compounds and their impact on human health. Be familiar with drinking water standards, regulatory aspects, and protection of municipal, community, and private well systems. (Spring)

SOIL 552 Environmental Water Quality
3 credits
Joint-listed with SOIL 452
Engineering design to monitor, evaluate, and minimize non-point pollution from agriculture, environmentally acceptable disposal of wastes, bioremediation. Additional project and report required for graduate credit. Two lectures and one 3-hour lab per week.
SOIL 556 North Idaho Field Trip
1 credit
Joint-listed with SOIL 456
Soils and land use in northern Idaho ecosystems; emphasis on soil parent
materials, soil formation and morphology, and soil-plant community
relationships. Graded P/F. One 3-day field trip; additional class meetings
and assignments before and after field trip. Cooperative: open to WSU
degree-seeking students.
Prereq: SOIL 205 or Permission

SOIL 598 (s) Internship
Credit arranged
Graded P/F
Prereq: Permission

SOIL 599 (s) Research
Credit arranged
Research not directly related to a thesis or dissertation.
Prereq: Permission

SOIL 600 Doctoral Research and Dissertation
Credit arranged
