WILDLIFE RESOURCES (WLF)

WLF 102 The Fish and Wildlife Professions
1 credit
Cross-listed with FISH 102
Orientation of students to the profession of fishery resources and wildlife resources: introduction to fish and wildlife faculty, review of fish and wildlife curriculum, awareness of career opportunities, employment procedures, and associated job duties/responsibilities, job preparation, educational preparation, and management challenges in the Pacific Northwest. (Fall only)

WLF 105 Hunter Education
1 credit
The course provides an overview of hunter ethics; wildlife management, conservation, and survival; and wildlife laws and law enforcement. This course also fulfills the state requirement for hunter education for purchase of a hunting license. Course includes in-class instruction and one outdoor field day. Graded P/F.

WLF 200 (s) Seminar
Credit arranged

WLF 201 Fish and Wildlife Applications
2 credits
This course will introduce students to research and monitoring methods, data analysis and report writing in fish and wildlife sciences, potential state, federal and tribal employers, and management challenges for fish and wildlife populations and habitats. The course will include an off campus experiential learning field trip and activities with professional mentors.
Prereq: NR 101 or Permission

WLF 203 (s) Workshop
Credit arranged

WLF 204 (s) Special Topics
Credit arranged

WLF 205 Wildlife Law Enforcement
2 credits
This course will provide students with an introduction to the history of wildlife laws and the role of a Conservation Officer. It will also provide students with a better understanding of wildlife crimes and the impact they have on fish and wildlife. This course is designed for students seeking a career in wildlife law enforcement as well as those pursuing a career in wildlife/fisheries/habitat management.

WLF 220 Principles of Ecology
3 credits
Cross-listed with FOR 221 and REM 221
Principles of ecology and their relevance to management of natural resources. Major topics include plant and wildlife population, community, ecosystem, and landscape level processes and how these processes interact with the environment. Exploration of how ecosystems are affected by humans and global change. Introduction to the types of questions asked by ecologists, the principal concepts and theories that guide ecological inquiry, and the methods that are used to answer ecological questions. Both terrestrial and aquatic systems are considered.
Prereq: BIOL 102/BIOL 102L or BIOL 114 or BIOL 115 or PLSC 205; or Permission

WLF 299 (s) Directed Study
Credit arranged

WLF 314 Ecology of Terrestrial Vertebrates
3 credits
Ecology and natural history of birds, mammals, reptiles, and amphibians. (Fall only)
Prereq: FOR 221, REM 221, or BIOL 314

WLF 315 Techniques Laboratory
2 credits
Techniques associated with wildlife research and local habitats and areas where wildlife species are present. Three hours of lab per week. One weekend field trip required. Two additional animal trapping sessions also required. (Fall only)
Prereq or Coreq: WLF 314

WLF 370 Management and Communication of Scientific Data
3 credits
Students will learn skills to analyze and present scientific data in the fish and wildlife field. Analyses will be conducted in R, spreadsheets, and basic data management software. Data summaries will include graphical and tabular presentation. Written presentation of scientific information will include organization, grammar, and citation formats appropriate for scientific reports.

WLF 371 Physiological Ecology of Wildlife
2 credits
Study of how biotic and abiotic components of the environment influence animal physiology, and how the physiology of animals influences their ecology (e.g., behavior, distribution, etc.). Major topics include energetics, thermal ecology, nutritional ecology, reproductive physiology, locomotion and movement, and adaptations to extreme environments. (Spring only)
Prereq: BIOL 213

WLF 398 (s) Renewable Natural Resources Internship
Credit arranged
Supervised field experience with an appropriate public or private agency. Required for cooperative education students. Graded P/F.
Prereq: Department Permission

WLF 400 (s) Seminar
Credit arranged
Prereq: Permission

WLF 403 (s) Workshop
Credit arranged

WLF 404 (s) Special Topics
Credit arranged

WLF 411 Wildland Habitat Ecology and Assessment
2 credits
Cross-listed with REM 411
This course integrates field sampling with quantitative and theoretical concepts related to scientific research, wildlife habitat, and land management practices. Students collect, analyze, and report on ecological data in various formats, and learn specific protocols used by professionals to assess wildlife habitat. Class field trips required. Recommended preparation: REM 252 and REM 253, REM 341, or other plant identification class; ability to use Excel. Co-enrollment in REM 410 is recommended.
Prereq: STAT 251 or Permission
WLF 415 Wildlife Conclave
1 credit
Objectives of the course are to 1) acquaint students with the procedures and rules used in the Wildlife Quiz Bowl at the Western Students Wildlife Conclave held annually in March, 2) practice in game situations so that our team is competitive at the event, and 3) to learn practical facts and trivia about wildlife natural history, identification, history of wildlife management and laws, wildlife ecology and management, and related natural resource sciences. The course meets twice a week from the beginning of spring semester until spring break (when Conclave is held). Students are assigned areas to study, have quizzes on those areas of knowledge, and provide new written questions with answers for possible use in future classes.

WLF 416 Molecular Methods in Population Biology
1 credit
Joint-listed with WLF 516.
Introductory workshop on basic procedures in molecular biology that have applications in ecology and evolutionary biology. Course includes DNA/RNA extraction, PCR, simple recombinant DNA procedures, DNA sequencing, and data analysis. Independent study project required for graduate credit. Recommended preparation: Introductory level genetics, general and organic chemistry courses. (Fall only)
Prereq: Permission

WLF 440 Conservation Biology
3 credits
Patterns of biological diversity; factors producing changes in diversity; values of diversity; management principles applied to small populations, protected areas, landscape linkages, biotic integrity, restoration, legal issues, and funding sources. (Fall only)
Prereq: FOR 221, REM 221, or BIOL 314 or Permission

WLF 448 Fish and Wildlife Population Ecology
4 credits
Dynamics of animal populations resulting from balance between birth, death, and movement processes; quantitative methods for measuring distribution, abundance, survival and population growth; competition, predation, and self-regulation; viability and management of fish and wildlife populations. Three lectures and one lab per week. One weekend field trip required. (Spring only)
Prereq: STAT 251; MATH 160 or MATH 170

WLF 473 ECB Senior Presentation
1 credit
Gen Ed: Senior Experience
Cross-listed with FISH 473, FOR 473, FSP 473, NRS 473, and REM 473
Reporting and presenting the senior project (thesis or internship); taken after or concurrently with WLF 485 or WLF 497. Serves as the senior capstone course for Ecology and Conservation Biology (ECB).
Prereq: Instructor Permission

WLF 482 Ornithology
4 credits
Evolution, systematics, distribution, identification, and biology of birds, including current conservation efforts. Two days of field trips required. (Spring only)
Prereq: BIOL 114 and BIOL 115

WLF 483 Senior Project Presentation
1 credit
Cross-listed with FISH 483, FOR 483, and NRS 483
Reporting and presenting the senior project (thesis or internship); taken after or concurrently with WLF 485 or WLF 497.
WLF 516 Molecular Methods in Population Biology
1 credit
Joint-listed with WLF 416. Introductory workshop on basic procedures in molecular biology that have applications in ecology and evolutionary biology. Course includes DNA/RNA extraction, PCR, simple recombinant DNA procedures, DNA sequencing, and data analysis. Independent study project required for graduate credit. Recommended preparation: Introductory level genetics, general and organic chemistry courses. (Fall only)
Prereq: Permission

WLF 540 Conservation Genetics
1-3 credits, max 3
Basic principles of population genetics and phylogenetics and their applications to the field of conservation and natural resource management. Taught in three 1-credit modules, students can register for 1-3 credits. Module 1 includes introduction to conservation genetics and phylogenetics, module 2 includes population genetic theory and methods, and module 3 includes applications in conservation genetics and genomics. Cooperative: open to WSU degree-seeking students. (Spring, alt/years)

WLF 545 Wildlife Habitat Ecology
2-3 credits
Reading and discussion on habitat concepts, analyses, and applications. Students enrolled in the 3rd credit will complete additional readings and quantitative problem sets. Cooperative: open to WSU degree-seeking students.
Prereq: WLF 492 or Permission, animal and plant ecology

WLF 550 Quantitative Analysis of Fish and Wildlife Populations
2 credits
Contemporary mathematical and statistical models central to fish and wildlife research and management, including capture-recapture, occupancy, resource selection, movement, population, growth, and hierarchical models.
Prereq: MATH 160 or equivalent, STAT 431

WLF 551 Applied Mixed Effects Modeling
2 credits
Analysis of complex ecological data with mixed effects models and their various extensions. After a brief review of generalized linear modeling, students will gain practical experience in the use of linear and generalized linear models to analyze hierarchical datasets (continuous, count, binary, etc.) that include inherent serial or spatial autocorrelation. Cooperative: open to WSU degree-seeking students. (Fall, alt/years)
Prereq: STAT 431

WLF 552 Ecological Modeling
3 credits
Linear and nonlinear dynamical models of biological systems; computer-intensive introduction to concepts of stability, attractors, bifurcations, chaos; model identification, estimation, and evaluation; applications in aquatic and terrestrial ecological communities. (Spring, alt/years)
Prereq: MATH 175 and FOR 221 or Permission

WLF 555 Statistical Ecology
3 credits
Cross-listed with STAT 555
Stochastic models in ecological work; discrete and continuous statistical distributions, birth-death processes, diffusion processes; applications in population dynamics, population genetics, ecological sampling, spatial analysis, and conservation biology. Cooperative: open to WSU degree-seeking students. (Spring, alt/years)
Prereq: MATH 451 or Permission

WLF 561 Landscape Genetics
2 credits
Landscape genetics is an interdisciplinary field of study that evaluates how landscape and environmental features influence gene flow, population structure and local adaptation by integrating landscape ecology, population genetics, and spatial statistics. This course covers applications of landscape genetics that can improve our understanding of ecology, evolution, and management of wild populations. Recommended Preparation: Population genetics or conservation genetics, and multivariate or spatial statistics. Cooperative: open to WSU degree-seeking students. (Spring, alt/even years)

WLF 562 Landscape Genetics Lab
1-2 credits
This optional lab course is a complement to WLF 561 Landscape genetics and should be taken concurrently. Students will learn to analyze and interpret landscape genetic datasets using a variety of methods. If taken for two credits, students will do a project analyzing landscape genetic data. Recommended Preparation: Population genetics or conservation genetics, and multivariate or spatial statistics. Cooperative: open to WSU degree-seeking students. (Spring, alt/even years)
Coreq: WLF 561

WLF 575 Behavioral Ecology
2 credits
Behavioral Ecology is the study of evolutionary causes and fitness consequences of behavioral decisions by animals. This course will explore theoretical and empirical approaches to understanding behavioral ecology across a diversity of species, with an emphasis on vertebrates. The format will include short lectures and facilitated discussions of primary literature. The course is open to graduate students and seniors with instructor permission. Cooperative: open to WSU degree-seeking students.

WLF 598 (s) Internship
Credit arranged

WLF 599 (s) Non-thesis Master's Research
Credit arranged
Research not directly related to a thesis or dissertation.
Prereq: Permission

WLF 600 Doctoral Research and Dissertation
Credit arranged
Prereq: Admission to the doctoral program in Natural Resources and Department Permission
