Total Hours		137

The degree map is a guide for the timely completion of your curricular requirements. Your academic advisor or department may be contacted for assistance in interpreting this map. This map is not reflective of your academic history or transcript and it is not official notification of completion of degree or certificate requirements. Please contact the Registrar's Office regarding your official degree/certificate completion status.

1. Students will develop and implement a program to improve the quality of organizational processes.
2. Students will demonstrate an understanding of the use of both "soft" project management skills (e.g., stakeholder management, conflict management, project leadership) and "hard" project management skills (e.g., budgeting, scheduling, risk management) to successfully manage a project through its life cycle (i.e., initiation, planning, execution, and closing).
3. Students will recommend process improvements for a business process based on computer models that they created for the business process in question.
4. Students will be able to and are expected to develop solutions to common supply chain problems.
5. Students will develop, manage, and improve production planning and control and inventory management systems.
