Students may request, after approval by their academic advisor and the Petition Committee, to use other upper division technical courses in the College of Science or in Engineering Management (EM) in partial fulfillment of this requirement. Of these eighteen credits a minimum of twelve credits must be selected from electrical engineering courses including at least nine credits from these courses.

Courses to total 128 credits for this degree, not counting ENGL 101 , MATH 143 , and other courses that might be required to remove deficiencies.

Students majoring in electrical engineering must earn a grade of P in ECE 292 and a grade of C or better in each of the following courses for graduation and before registration is permitted in upper-division electrical and computer engineering courses:

Students majoring in electrical engineering or computer engineering must meet the college requirements for admission to classes (see "Admission to Classes (https://catalog.uidaho.edu/colleges-related-units/

engineering/)" under College of Engineering (https://catalog.uidaho.edu/colleges-related-units/engineering/)).

Any student majoring in electrical engineering may accumulate no more than five (5) letter grades of Ds and Fs in mathematics, science, or engineering courses that are used to satisfy graduation requirements. Included in this number are multiple repeats of a single class or single repeats in multiple classes and courses transferred from other institutions. Specifically excluded are D or F grades from laboratory sections associated with courses.

The degree map is a guide for the timely completion of your curricular requirements. Your academic advisor or department may be contacted

for assistance in interpreting this map. This map is not reflective of your academic history or transcript, and it is not official notification of completion of degree or certificate requirements. Please contact the Registrar's Office regarding your official degree/certificate completion status.

The student will be able to:

1.   identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

2.   apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

3.   communicate effectively with a range of audiences.

4.   recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

5.   function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

6.   develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

7.   acquire and apply new knowledge as needed, using appropriate learning strategies.
